

## Vacuum Tube Lifter FORCE-LIFT | 2

### Product information

FORCE-LIFT | 2 is a stronger version of FORCE-LIFT®, which is particularly useful in dispatch areas for receiving and delivering goods, in warehouses when unpacking and packing goods and it is ideal for order picking and palletizing. This tube lifter can lift 300 kg, and has a lifting speed of up to 60 m/min.

Vacuum tube lifter FORCE-LIFT | 2 is operated with two hands via the ergonomically designed operating handle, which is mounted on an adjustable arm. For an arm length of more than 500 mm, a spring balancer is supplied, which ensures that the workpiece remains in the center of gravity. The load is easily released with the integrated quick-release system, which cuts off the air supply in the tube when it is activated.

You choose the suction foot according to the material you have to lift and there are 3 types of suction feet:

#### **Double rectangular suction foot**

This suction foot is equipped with two elongated suction lips, which can be adjusted back and forth on the cross rail, and it can be used on:

#### **Air permeable surfaces such as:**

Boxes  
Wood (natural wood, OSB, MDF)

#### **Closed surfaces like:**

Metal parts  
Glass  
Coated wood  
Plastic parts

#### **Bag suction foot**

Bags  
Sacks

#### **Round suction foot**

Airtight surfaces  
Barrels  
Containers

The suction foot is easily replaced with other types of suction feet thanks to the quick-release coupling.

#### **Specifications:**

- Load capacity: 300 kg
- Lifting tube diameter: Ø 120 mm, Ø 160 mm, Ø 200 mm eller Ø 300 mm
- Vacuum generator: Pump VAL 50T, VAL 80T | Blower: 3 kW
- Noise level: Pump 55 dB[A] | Blower: 74-80 dB[A]

- IP protection class: IP 31

**Option:**

Lifting arm FORCE-LIFT | 2 ErgoPlus

**Marking:** According to standard

**Standard:** EN 14238
