

Load testing

Product information

Certex performs all types of load testing, and tests to verify the capacity of lifting gear.

We have various test facilities available and we also collaborate with external partners on stress tests.

We can carry out tests on, for example:

- Steel wire ropes and chains
- Fiber ropes and moorings ropes
- Lifting beams and lifting tools
- Welded or forged constructions

Contact our service department via the form below and get an offer for a load test of your equipment.

Need help with a load test?

Then send the information on the subject to our specialists and get a non-binding offer.
